

User Report: Siri

Status: Mod

Notes:

-Siri is the first non OG mod and has been with the team for little over two months. The only two mods that have been with the team longer are D Vana and Shieldzee.

ISSUE #1: DISRESPECTING USERS

Siri has had an issue with the community multiple times most notably not treating users so nicely as seen here in these examples:

Siri has also straight up denied users for being in the Superstar role based on very little evidence versus the other amounts of evidence that was for that user to be Superstar. He also has 'accidentally' skipped art submissions for art contests (though D Vana should've stepped in and said it was not ok). Siri has

ISSUE #2: UNNECESSARY BANS

This is an issue that I will take partial blame for. Siri seems to have a habit of assuming the worst in people and bans some users on the spot. D Vana should've stepped in and said no but they didn't want to get thrown in into an argument. It should also be noted that Siri has skipped the 5 strike system multiple times when discussing user's punishments when a strike or discussion with a user was all that was necessary.

ISSUE #3: ABUSE OF POWER

Siri has abused powers multiple times as seen with the creation of the word blacklist that was almost implemented without the agreement or discussion of a few other mods or when Siri has server muted people when it was only necessary to mute clientside, leaving users muted for extended periods of time. Siri has also created rules on the spot even issuing strikes and timeouts to users who said 'nigger' only having it resolved when an admin had to step in. It
